

Accelerate Smarter Care

Transforming the value-based care ecosystem through powerful medical management technology.

Elligint Health is a mission-driven organization dedicated to helping payers and providers accelerate value-based care through a seamlessly connected, member-centric care ecosystem powered by advanced technology and rich data insights. Our goal is to empower payers and providers with the tools and solutions they need to deliver proactive, personalized care so that more people receive the right care at the right time, and lives are truly changed for the better.

Partnering for Success

Elligint Health believes in taking a collaborative approach to developing and implementing projects. We see every relationship as a true partnership, with our clients actively engaged in each step of the process.

Implementation projects leverage an agile method that begins with discovery and ends with Go-Live.

Once the platform is live, you'll have ongoing support from Elligint Health's product experts, customer care team, and a dedicated account manager — all here to help you adapt, grow, and get the most value from the solution as your needs evolve.

The Elligint Health Helios® Difference

Designed as a collaborative ecosystem, Helios helps organizations align and optimize their utilization management (UM) and care management (CM) programs. Our solution's unmatched 90% configurability, powerful rules engines, and seamless integration capabilities offer exceptional flexibility and customizable workflows that deliver an intuitive user experience, drive adoption, and streamline care management and business processes.

360° Member Views

View and update critical data and information in real time across the care continuum for cross-team collaboration to quickly identify and resolve care gaps, improve health outcomes, and drive operational and cost efficiencies.

Industry-leading Rules Engines & Workflows

Use our out-of-the-box, clinically-integrated workflows or create your own quickly and easily. Our configurable rules engines and customizable workflows automate critical processes to streamline tasking, authorizations, referrals, appeals, and more.

Built-in FHIR® Interoperability

Elligint Health Helios provides an integrated, low-code, plug-and-play FHIR data interoperability application that drives rapid FHIR transformations and organization-wide data sharing. Hundreds of integrations with third-party data sources have been successfully completed using Helios.

Closed-loop Ecosystem Partners

Helios operates as a closed-loop ecosystem for optimized care coordination, working with a network of leading industry and technology partners to offer integrations for identifying and addressing social determinants of health, predictive analytics for population health needs, automation of prior authorizations, and comprehensive quality reporting capabilities for auditing and compliance.

Secure, Accurate & Confident

Helios is HITRUST CSF certified, NCQA Prevalidated for Population Health Management, and HIPAA- and HITECH-compliant. Our solution is integrated with both MCC's and Change Healthcare's InterQual evidence-based clinical guidelines, but it also supports the use of organization-specific medical policy or state guidelines.

Harnessing AI to Accelerate Value

Helios is artificial intelligence (AI) ready and can leverage AI-driven solutions using our strategic partners to enhance UM efficiency, determine rising member risk, and improve medication reconciliation and adherence. This enables expedited care delivery and better management of high-cost populations, helping to prevent high-cost outcomes.

Powerful Analytics & Insights

Clients can leverage out-of-the-box, configurable and custom reporting, dashboards, and views using Helios Insights or leverage advanced analytics via AWS QuickSight. Our analytics power actionable insights, improve processes and workflows, and identify operational optimizations that enhance efficiency and provide high return on investment.

Cloud-Based Technology, Scalable for Growth

Our user-friendly, cloud-based infrastructure fosters efficient configurability and integrated data interoperability. As a SaaS platform, Helios can easily scale for population changes and organizational growth.

Supporting Payers & Health Plans Everywhere

Ready to Go, Easy to Customize

We have provided our highly scalable Helios platform and services for more than 13 million individuals enrolled in plans across the country, ranging from community health plans and accountable and coordinated care entities to Medicaid plans, Medicare Advantage plans, and commercial health systems.

Many of these health plans have transitioned from heavily customized systems to Helios specifically for its robust out-of-the-box capabilities, integrated solutions, intuitive design, and 90% configurability.

We are proud to have a proven track record of working effectively to support clients with multiple programs and connected organizations, federal and state-specific regulations, readiness reviews, audits, and interoperability requirements. The Helios platform is an ideal choice for government programs, health plans, and payers of all sizes.

We Proudly Support:

- Medicare Advantage and Medicaid Plans
- LTSS, Behavioral Health, and Specialty Care Organizations
- National, Regional, and Community-focused Health Care Plans
- Payers, Health Systems, and Providers
- Accountable Care Organizations (ACOs)
- Managed Care Organizations (MCOs)
- Home Health Care Organizations
- Third-Party Administrators
- Coordinated Care Organizations
- Non-Profit Organizations

With Helios, Clients Can:

1. **Transform Care Operations:** Quickly identify and address care gaps, health needs, and risks.
2. **Make It Your Own:** Easily configure existing workflows, rules, views, and dashboards, or create custom ones.
3. **Report Confidently:** Leverage reporting and metrics for HEDIS, NCQA, CMS & more.
4. **Get More Done:** Utilize intelligent workflows driven by automations to streamline processes and enhance productivity.

Discover the Elligint Health Helios Difference

Intelligent Automations Powered by Real-Time Data

Helios has the most configurable rules engine in the industry, allowing clients to customize everything from configurable UM or CM workflows to automated triggers for tasks, notifications, flags, and more.

Helios' flexibility, user-friendly design, and reporting capabilities have allowed our clients to:

- Improve member care experiences and enhance program capabilities
- Gain deeper insights into care team productivity
- Bring data together so their CM and UM teams can make the best decisions about members' care
- Identify and execute opportunities for efficiency and productivity improvements
- Easily get the medical management data necessary for CMS reporting and auditing, NCQA compliance, and other external and internal needs

Secure, Validated, Trusted

Helios is HIPAA and HITECH compliant, NCQA Prevalidated for Population Health Management, and HITRUST CSF certified.

It meets or exceeds all applicable regulatory requirements and empowers you to have the medical management data you need for CMS reporting and audits NCQA compliance, and other external and internal needs.

Accelerate Smarter Care — Deliver Measurable Results

See how Elligint Health empowers your organization to work faster, smarter, and with greater impact. From streamlining authorizations and appeals to driving measurable gains in care quality, compliance, and efficiency, Helios transforms your performance.
